## SRP™ (School Resource Planning)

School Resource Planning (SRP) application is an end to end technological solution for managing the day to affairs of a School Management right from admission of a Student till his exit from the School. The SRP Modules have been conceptualized after a deep study about the functioning of schools.

SRP reduces the Time & Energy spent on Administrative task and increases the Quality of Education which is the ultimate Aim of any Successful School Management." SRP is an interactive platform for the entities and constituents of School viz., Teaching Staff, Management, Students, Parents etc.,

### An Introduction To School Resource Planning (SRP)

Technology has blended well with modern life and has dramatically changed the way we live. People have become increasingly reliant on technology and are keeping abreast with the technology changes.

While we have adopted technology even in day-to-day affairs, will the schools be left behind?

Education is a life long process and starts with schools. As education thrives on information, having direct access to information provides a competitive edge. It is a pre-requisite for the stakeholders of schools - teachers, students, management and parents - to obtain the correct information from the right sources for both teaching and learning. Technology can be effectively harnessed towards imparting better education in schools.

### Experience the difference

The entire processes of managing a school can be simplified by the means of technology. The all-pervasive World Wide Web can be harnessed for the rendition of information in school.

Now-a-days people prefer visiting large super markets and shopping malls, instead of visiting petty shops for their purchases. This trend has caught up with the people not only because of saving lot of time and energy but also the quality and the wide range of the products one gets to purchase at a competitive price.

Similarly, what is the point in implementing stand-alone softwares to manage different function of schools? Like the petty shops, the stand-alone softwares are becoming passé Like the huge super markets shopping malls, our SRP - a truly integrated, cost effective and web based school management software - provides the solution for effectively managing the entire functions of a school with ease. School Resource Planning (SRP) has been designed with emphasis on the functionality, utility and report generation to aid the school management in all spheres of school activities. It is time to move ahead in tune with technology, an early beginning is always beneficial in the long run.

## SRP™ (School Resource Planning)

### Utilise the benefits of School Resource Planning (SRP)

Optimization and resource utilization is the biggest challenge in school management. School Resource Planning (SRP), a web based software system, competently addresses the diverse needs of a school management by effectively integrating all the departments of the school with a modular approach.

A state of the art comprehensive software, School Resource Planning (SRP), encompasses a spectrum of activities for managing the functions of a school. Efficiently providing end-to-end solution without any redundancy, School Resource Planning (SRP) ensures tremendous savings in cost and time.

Comprising of 23 modules covering extensively all aspects of school management - from Admission procedures to Alumni records - School Resource Planning (SRP) has been designed keeping in view of the needs required for managing a school effortlessly. Built with remarkably comprehensive features School Resource Planning (SRP) provides a powerful integration of data between modules to ensure seamless exchange of data and generate various reports instantly as and when required.

An interactive and user-friendly software, School Resource Planning (SRP) incorporates the best practices that enable all stakeholders of education to collaborate and make knowledge-driven decisions for the development of the students. As a result it enhances the overall productivity of a school.

It is our goal to provide the most cost-effective school management system software that runs on minimal hardware. We are happy to give you a demo of School Resource Planning (SRP). Give us an opportunity and we are sure you will be excited about the features and the performance.

### Simplicity of use, Diverse features, Great benefits -

#### Hallmarks of School Resource Planning (SRP)
